

WELCOME MESSAGE

The first international conference on Bioethics in the New Age of Science took place in 2017 at the “Vasile Goldis” Western University of Arad (Romania). Following its success, the conference moved its premises in 2018 to Szeged (Hungary) and now, in 2019, it moves to Belgrade (Serbia) in order to enhance international participation as much as possible. We are happy to acknowledge that the international interest in the conference has grown significantly over the past two years.

BNAS 2019 will offer participants a support to explore ethical and legal problems in bioethics in the context of the new challenges generated by the scientific discoveries of the 21st century. The aim of the conference is to facilitate the multidisciplinary approach of bioethics, by gathering specialists from bioethics and its connected fields through the main topics of the conference: bioethics and law; medical ethics; ethical aspects in research and biomedical technology; bioethics education; bioethics committees.

My pleasant duty is to gratefully acknowledge the support provided by the scientific organizers for their work, the Faculty of Medicine - University of Belgrade, and all those involved in the preparation of the conference and the program. Last but not least, we would like to thank the participants for their valuable contribution!

I wish everyone a pleasant stay in Belgrade
and a successful conference!
